## Summary

I'm a self-taught full-stack developer who builds and deploys scalable web applications with intelligent AI-powered backends and clean, responsive frontends. I have experience in software architecture and performance optimization, ensuring apps run efficiently and reliably.

When I'm not working, I spend time exploring new technologies, sharpening my skills, and contributing to open source projects.

## Experience

<b>Portals</b>	March 2025 - June 2025
Frontend Developer	Remote

Built and maintained all dynamic pages for the startup's web platform using Next.js, React, TypeScript, and Tailwind CSS. Focused on creating responsive, high-performance UIs and integrating APIs to deliver a smooth user experience. Collaborated directly with the founding team on product features and frontend architecture.

<b>Freelance</b>	August 2024 - Till Date
Full-Stack Developer	Remote

Worked with clients to design and develop full-stack web applications using React, Next.js, Node.js, and Tailwind CSS. Handled everything from UI design to backend APIs and deployment. Focused on building scalable, secure, and performant apps with clean architecture and modern DevOps practices.
