SUMMARY

Full-Stack Software Engineer with hands-on experience building and scaling production SaaS products and microservices for startups. Former Founding Engineer and Technical Lead at Tayst AI (New York), responsible for end-to-end backend architecture, microservices infrastructure, and frontend delivery.

Proven open-source contributor with 550+ GitHub stars accross public repos.

EXPERIENCE

Tayst AI 12/2025 – 03/2026
Technical Lead New York, Remote

- Led architecture and delivery of the company's entire backend, frontend, and microservices stack, ensuring system reliability and horizontal scalability across production environments.
- Defined engineering standards, reviewed PRs, and mentored junior contributors; drove adoption of type-safe API patterns that reduced runtime errors across the codebase.
- Coordinated directly with US-based stakeholders to translate product requirements into technical roadmaps and shipped features on aggressive timelines.
- Owned deployment pipelines and infrastructure configuration on Vercel and serverless environments, maintaining high uptime for paying customers.

Tayst AI 09/2025 – 11/2025
Founding Engineer New York, Remote

- Joined as a founding engineer and built the company's scalable backend and microservices infrastructure from the ground up using Node.js, Nest.js, and PostgreSQL.
- Contributed to the frontend in Next.js and React, delivering core product UI flows and integrating backend APIs to create a seamless end-to-end user experience.
- Established database schema, authentication flows, and API contracts early in the product lifecycle, enabling rapid iteration as the team grew.

Portals 03/2025 – 06/2025
Frontend Developer London, Remote

- Built and maintained all dynamic pages for the startup's web platform using Next.js, React, TypeScript, and Tailwind CSS, delivering a responsive and performant UI.
- Integrated third-party and internal REST APIs, handling edge cases and loading states to ensure a smooth user experience across devices.
- Collaborated directly with the founding team on product features and frontend architecture decisions, iterating quickly based on user feedback.

Community Builder

- More than 50 fullstack projects.
- Maintains multiple repos with 550+ stars used in production projects worldwide.
- Contributed upstream fixes and improvements to third-party open-source projects across the JavaScript/TypeScript/Python ecosystem.
