

RAHUL RAJPUT

SOFTWARE ENGINEER

📍 Mumbai, India | ✉ rrahulrajput2006@gmail.com | ☎ +91 81080 68981 | 🌐 github.com/r2hu1
🌐 linkedin.com/in/r2hu1 | 🌐 r2hu1.is-a.dev

Summary

Software Engineer with hands-on production experience building web applications, native apps, developer tools, and open-source software. Comfortable across the entire stack from database design and API architecture to frontend delivery and deployment.

Known for shipping real products used by others, with 370+ GitHub stars across public repositories.

Experience

Founding Engineer & Co-Founder, RosterPro – India, Mumbai June 2026 – present

- Architected and built a type-safe, full-stack monorepo powering multiple web applications, backend services, APIs, and shared packages.
- Engineered scalable backend infrastructure with authentication, payments, real-time event streaming, caching, media management, and secure QR-based ordering workflows.
- Established end-to-end type safety by building shared API contracts, reusable UI components, and schema-first development workflows across the entire stack.
- Drove technical architecture, infrastructure, and product development with a strong focus on scalability, performance, reliability, and developer experience.

Software Engineer (TL), Tayst Ai – New York, NY (Remote) Dec 2025 – May 2026

- Led architecture and delivery of the company's entire backend, frontend, and microservices stack, ensuring system reliability and horizontal scalability across production environments
- Defined engineering standards, reviewed pull requests, and mentored junior contributors while driving adoption of type-safe Api patterns to reduce runtime errors
- Coordinated directly with Us-based stakeholders to translate product requirements into technical roadmaps and shipped features on aggressive timelines
- Owned deployment pipelines and infrastructure configuration on Vercel and serverless environments, maintaining high uptime for paying customers

Founding Engineer, Tayst Ai – New York, NY (Remote) Sept 2025 – Nov 2025

- Joined as a founding engineer and built the company's scalable backend and microservices infrastructure from the ground up
- Contributed to the frontend in Next.js and React, delivering core product Ui flows and integrating backend Apis to create a seamless end-to-end user experience
- Established database schema, authentication flows, and Api contracts early in the product lifecycle, enabling rapid iteration

Frontend Developer, Portals – London, UK (Remote) Mar 2025 – June 2025

- Built and maintained all dynamic pages for the startup's web platform using Next.js, React, TypeScript, and Tailwind Css, delivering a responsive and performant Ui
- Integrated third-party and internal Rest Apis, handling edge cases and loading states to ensure a smooth user experience across devices
- Collaborated directly with the founding team on product features and frontend architecture decisions, iterating quickly based on user feedback

Open-Source Builder, GitHub – Remote

- Developed more than 50 full-stack projects
- Has more than 500+ stars across repos

Selected Projects

Freerouter - LLM Router (sdk and openai compatible api)

- Built an open-source LLM routing platform with an OpenAI-compatible API and TypeScript SDK, enabling developers to switch between multiple AI providers through a unified interface with minimal code changes.
- Unified multiple LLM providers behind a single OpenAI-compatible API.
- Developed a type-safe TypeScript SDK for seamless AI model integration.
- Implemented automatic provider routing, retries, fallback handling, and error normalization.
- Built with modern TypeScript and optimized for low-latency production workloads.
- **Demo:-** <https://freerouter.vercel.app> ↗
- **Github:-** <https://github.com/r2hu1/freerouter> ↗

Border Code - Open Source Terminal Coding Agent (like claude code)

- Built a full-featured, on-device AI coding agent that runs entirely in the terminal.
- Features dual PLAN/BUILD modes, a multi-step ToolLoopAgent that autonomously reads, writes, and executes files (up to 25 steps), 7 sandboxed tools, support for OpenAI/Claude/Gemini/Groq/Mistral, persistent sessions via SQLite/Drizzle/JSON, 31 themes, and a rich TUI with mouse support.
- Monorepo structure across cli, core/api, and shared packages.
- **Github:-** <https://github.com/r2hu1/border-code> ↗
- **Demo:-** [View Demo Video](#) ↗

Gluer - Full-Stack Scheduling & Paid Bookings SaaS

- Built a production SaaS platform that combines calendar scheduling, link-in-bio management, and paid bookings in one product. Integrates two payment processors (Creem, Dodo) (not opensourced yet).
- Google Calendar OAuth sync, Resend for transactional email, and Cloudinary for storage.
- Stack: Next.js 16 App Router, TypeScript, Bun, PostgreSQL with Drizzle ORM, Better Auth, Tailwind v4, Cloudinary SDK, Tanstack Query.
- **Demo:-** <https://gluer.space> ↗
- **Demo Profile:-** <https://gluer.space> ↗

Cavio - AI-Integrated Writing Platform

- Built a full-featured Notion-like writing and content platform with AI autocomplete, an inline writing assistant (Gemini), rich document editor, folder management, and OAuth via Google and GitHub.
- Next.js, React.js, AI SDK, Gemini AI SDK, tRPC, Drizzle ORM, PostgreSQL, Better Auth, Tanstack Query.
- **Github:-** <https://github.com/r2hu1/cavio> ↗
- **Demo:-** <https://cavio.vercel.app> ↗

Skills

Frontend: Next.js, React, TypeScript, Angular.js, Svelte, Solid.js, Astro.js, Tailwind CSS

Backend: Nest.js, Nitro.js, Express, Bun, Node.js, Flask, Django, Python, Rest Api Design

Architecture: System Design, Scalable Distributed Systems, Microservices Architecture, Type-Safe APIs (Trpc), Grpc

DevOps & Cloud: Docker, CI/CD Pipelines, Vercel, Serverless, Edge Functions, Deployment Automation

Database: PostgreSQL, MongoDB, MySQL, SQL, Drizzle ORM, Prisma, Data Modeling, Query Optimization

AI & Tooling: Gemini AI, OpenAI API, AI Integration, AI-Assisted Coding, Claude
