PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience building and scaling production-grade applications, SaaS platforms, and distributed systems. Proven track record of architecting and delivering full-stack solutions from concept to production. Former Founding Engineer and Team Lead with experience leading engineering initiatives, mentoring developers, and driving technical execution. Open-source maintainer with 550+ combined GitHub stars across community-driven projects.

TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, Angular.js, Svelte, Solid.js, Astro.js, Tailwind Css

Backend: Nest.js, Nitro.js, Express, Bun, Node.js, Flask, Django, Python, Rest Api Design

Architecture: System Design, Scalable Distributed Systems, Microservices Architecture, Type-Safe Apis (Trpc), Grpc

DevOps & Cloud: Docker, Ci/Cd Pipelines, Vercel, Serverless, Edge Functions, Deployment Automation

Database: PostgreSQL, MongoDB, MySQL, SQL, Drizzle Orm, Prisma, Data Modeling, Query Optimization

Ai & Tooling: Gemini Ai, OpenAI Api, Ai Integration, Ai-Assisted Coding, Claude

PROFESSIONAL EXPERIENCE

Software Engineer (TL), Tayst Ai – New York, NY (Remote) Dec 2025 – May 2026

- Led architecture and delivery of the company's entire backend, frontend, and microservices stack, ensuring system reliability and horizontal scalability across production environments.
- Defined engineering standards, reviewed pull requests, and mentored junior contributors while driving adoption of type-safe Api patterns to reduce runtime errors.
- Coordinated directly with Us-based stakeholders to translate product requirements into technical roadmaps and shipped features on aggressive timelines.
- Owned deployment pipelines and infrastructure configuration on Vercel and serverless environments, maintaining high uptime for paying customers.

Founding Engineer, Tayst Ai – New York, NY (Remote) Sept 2025 – Nov 2025

- Joined as a founding engineer and built the company's scalable backend and microservices infrastructure from the ground up using Node.js, Nest.js, and PostgreSQL.
- Contributed to the frontend in Next.js and React, delivering core product Ui flows and integrating backend Apis to create a seamless end-to-end user experience.
- Established database schema, authentication flows, and Api contracts early in the product lifecycle, enabling rapid iteration.

Frontend Developer, Portals – London, UK (Remote) Mar 2025 – June 2025

- Built and maintained all dynamic pages for the startup's web platform using Next.js, React, TypeScript, and Tailwind Css, delivering a responsive and performant Ui.
- Integrated third-party and internal Rest Apis, handling edge cases and loading states to ensure a smooth user experience across devices.
- Collaborated directly with the founding team on product features and frontend architecture decisions, iterating quickly based on user feedback.

Opensource Contributor, Github – Remote

- Developed more than 50 full-stack projects and maintains multiple repositories, used in production projects worldwide.
- Contributed upstream fixes and improvements to third-party open-source projects across the JavaScript, TypeScript, and Python ecosystem.

SELECTED PROJECTS

Bud - Ai Powered Cli Companion

An Ai-powered Cli that converts natural language into real shell commands with context awareness and safety checks.

- <https://github.com/r2hu1/bud> ↗

Gluer - Meeting Scheduler and Monetization

A fully integrated platform that helps with scheduling meetings, managing links, and handling free and paid bookings without manual invoicing.

- <https://gluer.space> ↗

Rnpm - Rust-based Npm Alternative

A high-performance package manager for Node.js projects written in Rust, featuring concurrent dependency resolution and parallel downloads for faster installation.

- <https://github.com/r2hu1/rnpm> ↗

Cavio - Ai-Integrated Writing App

A Notion-inspired writing platform built for content writing, blogging, and journaling, featuring Ai autocomplete and an integrated writing assistant. Built with Next.js, Trpc, Drizzle Orm, PostgreSQL, and Gemini Ai.

- <https://cavio.pro> ↗

Ration - Encrypted Env Variable Manager

A secure cloud platform for storing, syncing, and managing environment variables across projects and teams with Aes-256 enterprise-grade encryption.

- <https://ration.cloud> ↗

My Socials - Social Link Aggregator

A link-in-bio tool that consolidates all social profiles and content into a single shareable page, built with Next.js and Tailwind Css.

- <https://mysocialz.vercel.app> ↗
