SUMMARY

Full-Stack Software Engineer specializing in scalable SaaS products and microservices for US-based startups. As a former Technical Lead and Founding Engineer at Tayst AI, I built and scaled backend systems, frontend applications, and production infrastructure. Passionate about performance, reliability, and delivering end-to-end solutions.

EXPERIENCE

OpenSource Contributor <i>Community Builder</i> I also enjoy contributing to open source. I've built several open-source projects ranging from web apps and APIs to micro apps, backend systems, and even some AI projects. I've also contributed to a number of other open-source projects along the way.	08/2024 – Till Date Remote
Tayst AI <i>Technical Lead</i> I'm responsible for leading the development of the company's backend, frontend and microservices infrastructure, ensuring scalability and reliability.	12/2025 – 03/2026 New York, Remote
Tayst AI <i>Founding Engineer</i> As a Founding Engineer at Tayst, a U.S.-based startup, I'm building the company's scalable backend and microservices infrastructure, while also contributing to the frontend to deliver a seamless user experience.	09/2025 – 11/2025 New York, Remote
Portals <i>Frontend Developer</i> Built and maintained all dynamic pages for the startup's web platform using Next.js, React, TypeScript, and Tailwind CSS. Focused on creating responsive, high-performance UIs and integrating APIs to deliver a smooth user experience. Collaborated directly with the founding team on product features and frontend architecture.	03/2025 – 06/2025 London, Remote

SELECTED PROJECTS

Gluer - Better scheduling and social presence 
A Better scheduling, link in bio for creators, consultants and for professionals who sell their time and knowledge, with automatic payments, scheduling, reminders and many more.

RNPM - npm alternative written in rust [↗](#)

A high-performance package manager for Node.js projects, written in Rust. Features concurrent dependency resolution and parallel downloads for significantly faster installation times.

Cavio - AI-Integrated Writing App [↗](#)

A Notion-inspired writing platform built for content writing, blogging, and journaling, featuring AI autocomplete and an integrated writing assistant. Built with Next.js, tRPC, Drizzle ORM, PostgreSQL, and Gemini AI.

Ration - Encrypted Env Variable Manager [↗](#)

A secure cloud platform for storing, syncing, and managing environment variables across projects and teams with AES-256 enterprise-grade encryption.

Codebin - Code Snippet Sharing [↗](#)

A platform for sharing code snippets with syntax highlighting and output previews. Built with Next.js, Firebase, and Tailwind CSS.

MySocials - Social Link Aggregator [↗](#)

A link-in-bio tool that consolidates all social profiles and content into a single shareable page. Built with Next.js and Tailwind CSS.

AI Base - AI Tools Directory [↗](#)

A curated discovery platform for browsing and comparing AI tools and prompts across categories like chatbots, image generators, and coding assistants.

Shield - Password Manager [↗](#)

An end-to-end encrypted password manager for securely saving and managing credentials.

My Github - Browse my github! [↗](#)
